Nishant Sharma

AI Software Engineer · Ex-Cofounder at Macverin Tech
(macverin.com) · MS Computer Engineering at NYU · Building
Agentic AI

New York City Metropolitan Area

Summary

I've spent the past year deep in agentic AI building with it, and figuring out where it breaks and designing systems that fail less. A lot of experiments, a lot of dead ends, and slowly built intuition about what makes production retrieval and reasoning systems reliable rather than just convincing. That year became Singularity a production multi-agent research platform I shipped solo in 13 days. 25,500 lines of code, 44 retrieval skills, plan-before-retrieve orchestration, deployed on AWS at \$26/month. The speed was only possible because the hard thinking had already happened. I'm a two-time founder (Macverin, Wort.AI) finishing my M.S. in Computer Engineering at NYU Tandon in May 2026. My work lives at the intersection of agentic AI, LLM infrastructure, and production backend systems - RAG pipelines, multi-agent orchestration, structured outputs, async Python, full-stack deployment. I care about one thing in AI systems: does a real person with a real job trust it enough to act on it. If not, the system isn't done yet. Open to AI Engineer, ML Engineer, and founding engineer roles starting May 2026. OPT available. Portfolio: hellonish.dev

Experience

NYU Tandon School of Engineering

Teaching Assistant

September 2025 - May 2026 (9 months)

New York, NY

Graduate Machine Learning (CS-GY 6923) Teaching Assistant at Computer Science, New York University. Fall 2025 - Spring 2026

InGelt Study Abroad

Lead Software Engineer

September 2023 - August 2024 (1 year)

Delhi, India

1. Proposed and led design of a unified Node.js API with a single auth layer that resolved user role at runtime, serving four distinct consumer contexts (Teachers, Students, Organizations, internal Godview) from one codebase, cutting the need for separate backends per consumer type.
2. Built a Jenkins pipeline from scratch covering test, build, and deploy to EC2, removing manual deployment overhead and keeping a 3-engineer team in code rather than ops.
3. Architected a load balanced EC2 deployment with RDS, SQS, S3 and CloudFront for 99.9% availability, supporting zero downtime deploys across a multi tenant platform serving four user roles.

Computer Society of India

2 years 11 months

Technical Lead

June 2023 - June 2024 (1 year 1 month)

India

Web Development Mentor

October 2022 - May 2023 (8 months)

Python Programming Mentor

August 2021 - October 2022 (1 year 3 months)

Macverin Tech

Co-Founder and Chief Technology Officer

July 2022 - August 2023 (1 year 2 months)

India

1. Led team build of an internal visa application processing platform for an 8-person office, with custom inquiry forms, meeting scheduling, client tracking workflow, and Firebase authentication.
2. Integrated Stripe payments, Google Maps distance API with client-specified fare calculation logic, and Firebase auth across client platforms spanning ride-hailing, holiday booking, and operations tools.
3. Delivered 12 client platforms over 14 months, referral-driven, using Node.js, FastAPI, React/Next.js, PostgreSQL, MongoDB, and AWS, handling everything from client scoping to final deployment.

Chegg India

Subject Matter Expert Computer Science

September 2022 - July 2023 (11 months)

India

1. Delivered 300+ step-by-step academic solutions in computer science and engineering, maintaining a 97% helpfulness rating.
2. Simplified complex topics to enhance student understanding, driving engagement and learning outcomes.
3. Reviewed and improved solution accuracy, contributing to higher content quality and platform reliability.

Education

New York University

Master of Science - MS, Computer Engineering · (August 2024 - May 2026)

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology - BTech, Computer Science and Engineering · (August 2020 - June 2024)
